

SNAP GROMMETS – 6 PACK

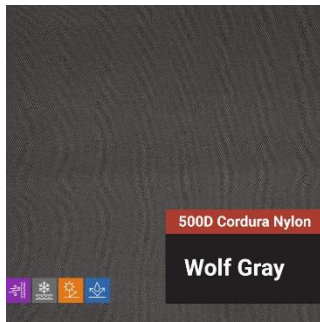

These snap grommets are perfect for all of your tie-down needs. Easily installed on all of our performance camo fabrics for a strong and secure tie-down point. Utilize the strength of these grommets to build hunting blinds or custom camouflage tarps. Add them to your hiking gear and backpacks for endless possibilities.

Our snap grommets are made from recycled polymers. They are virtually indestructible and are up to 4 times stronger than brass grommets when properly installed.

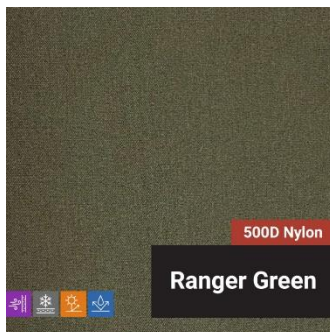

1000D NYLON – SOLID – COYOTE BROWN – 60"

Everything said about the 500D nylon and then some. Bigger yarns, more weight, more fabric and more strength make this the beast of the outdoor durable fabric offerings. Weighing a few ounces more than 500D, the 1000D nylon is perfect for when you want to make an item that will last for years to come and comes with a 2 pass polyurethane coating and a water repellent. Come in an array of solid colors and patterns.

500D CORDURA® NYLON WOLF GRAY

A durable fabric with high abrasion resistance, 500D Cordura nylon is perfect for outdoor usage and hard-wearing gear items. Our 500D Cordura nylon uses textured nylon 6,6 yarns for a rugged feel and comes with a 2 pass polyurethane coating and a water repellent. Perfect for gear bags, packs, seat covers, hunting blinds and tactical/hunting gear. Basically, if it's anything that will be used and abused, you should consider this fabric. Comes in an array of colors and patterns. Can be coated and uncoated.

500D NYLON – SOLID – RANGER GREEN – 60”

A durable fabric with high abrasion resistance, 500D nylon is perfect for outdoor usage and hard-wearing gear items. Our 500D nylon uses textured nylon 6,6 yarns for a rugged feel and comes with a 2 pass polyurethane coating and a water repellent. Perfect for gear bags, packs, seat covers, hunting blinds and tactical/hunting gear. Basically, if it's anything that will be used and abused, you should consider this fabric. Comes in an array of solid colors and patterns.

NYLON WEBBING – BLACK – 15 FT

Webbing is used for a variety of purposes, with the most typical applications being to secure accessory gear to a load-bearing platform (via MOLLE/PALS), as a carry system (either as handles or to secure padded shoulder harnesses) and for closure systems (typically when used with clips). Webbing can also be used for reinforcing packs and accessory pouches or for general reinforcement of many items. Comes in different sizes, colors and patterns.

All nylon webbing product are Berry Compliant, IR Compliant and meets certain Mil Specs (inquire). Polyester webbing is Berry Compliant only.

1000D CORDURA NYLON HEADLINER FABRIC, WITH 3MM FOAM AND SCRIM BACKING – OLIVE GRAY

Ideal for sewing, upholstery, car projects, hard corners, car headlining and crafts. Can be glued, sewn or stapled.
